

Greenhouse Gas (GHG) Policy

SFO Technologies is committed to operating as a responsible and sustainable organization. We recognize that greenhouse gas emissions are a significant contributor to climate change, and we are dedicated to taking meaningful steps to reduce our carbon footprint. This Greenhouse Gas Policy outlines our commitment to managing and reducing GHG emissions across our operations by adhering the following principles:

1. We will comply with all relevant GHG emission laws, regulations and other requirements including customer requirements.
2. We will measure and report our GHG emissions accurately and transparently, considering Scope 1, Scope 2, and, where feasible and relevant, Scope 3 emissions sources, in accordance with applicable international standards and guidelines.
3. We will set and regularly review GHG reduction targets to decrease our carbon emissions, with the ultimate aim of achieving carbon neutrality or net-zero emissions in the long term.
4. We will engage employees at all levels in GHG reduction initiatives and educate them about the importance of addressing climate change.
5. We will collaborate with our suppliers and partners to encourage GHG reduction efforts throughout the supply chain.
